*"Frontend Developer passionate about crafting accessible, pixel-perfect user interfaces that balance thoughtful design with robust engineering. My strength lies in bridging the gap between design and development, bringing creative ideas to life with clean, efficient code while ensuring every product is performant, user-friendly, and scalable."*

---

## WORK EXPERIENCE

---

### Frontend Developer

**OCBC Bank** | May 2026 - Current
***(Project Base under PT. Platinumetrix Global Inovasi)***

- Migrate large scale web enterprise application from Angular to React, involving approximately 50+ pages.
- Leveraged AI-assisted development to rapidly deliver multiple application modules, delivering modules approximately 2x faster than the initial project timeline.

**Technologies: TypeScript, React, Angular, Recoil, Ant Design**

---

### Frontend Developer

**Peruri** | October 2025 - January 2026
***(Project Base under PT. Digital Sejahtera Nusantara)***

- Contributed to the development of the MBG (Makan Bergizi Gratis) application.
- Handled the user management system, including user roles, permissions, and access control for 60,000+ users.
- Integrated Single Sign-On (SSO) system to main web app and assisted partner applications with sso integration.

**Technologies: TypeScript, React, Astro, Zustand, Tailwind CSS, React Query, React Hook Form, Kafka, Redis**

### Frontend Developer

**Telkom Indonesia** | April 2024 - March 2025
***(Contract under PT. Infomedia Solusi Humanika)***

- Led frontend team by defining and selecting the most suitable technology stack for the project and managing backlog distribution.
- Migrated mapping services from Google Maps to OpenLayers to reduce operational costs while maintaining application functionality.
- Optimized maps performance to efficiently display 10,000+ points of interest (POI) objects.

**Technologies: TypeScript, React, Next.js, Zustand, Tailwind CSS, React Query, React Hook Form, Firebase, Google Maps API, OpenLayers**

---

### Frontend Developer

**Telkom Indonesia** | February 2021 - March 2024
***(Contract under PT. Solusi Konvergen Indonesia)***

- Led frontend team by defining and selecting the most suitable technology stack for the project and managing backlog distribution.
- Contributed to one of the top-performing web applications at Telkom (MySIIS) with 50,000+ users, generating significant revenue and delivering high business impact.
- Mentored 4 interns from the Kampus Merdeka program to develop a web application.
- Implemented a Role-Based Access Control (RBAC) system using JWT authentication to manage user roles and enforce protected routes.
- Developed an interactive statistics dashboard using React Chart.
- Refactored and migrated legacy JavaScript codebase to TypeScript
- Implemented unit testing from scratch across all projects up to 20,000+ lines of code, using Vitest and React Testing Library.
- Built custom reusable components using Tailwind CSS based on a design system.
- Explored Flutter and contributed to mobile application development.
- Managed Docker configurations for application deployment.

**Technologies: TypeScript, React, Next.js, Zustand, Tailwind CSS, React Query, React Hook Form, Firebase, Google Maps API, Dart, Flutter**

### Frontend Developer

**Telkom Indonesia** | May 2020 - Januari 2021
***(Project Based under Tribe MyIndiHomeX)***

- Selected as one of 2 participants out of 16 bootcamp participants.
- Created a new enterprise project from scratch using React and Next.js.
- Exploring and using Google Maps API for interactive maps, dynamic markers, geolocation, and etc.

**Technologies: JavaScript, React, Next.js, Redux, SCSS, Google Maps API**

---

## EDUCATION AND TRAINING

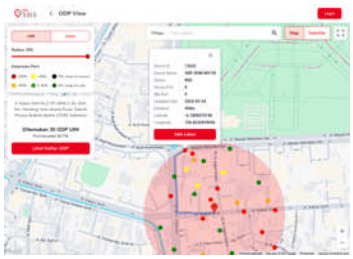

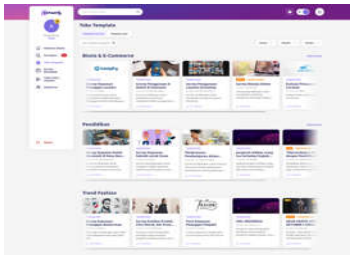

### Pijar Camp Academy, Depok

**Fullstack Developer Offline Bootcamp**
December 2019 - February 2020

### SMK PGRI 11 Ciledug, Tangerang

**Computer and Networking Engineering**
July 2012 - June 2015

## FEATURED PROJECTS

|  |  |  |
|---|---|---|
| **MySIIS** | **SIPGN** | **Kutanya** |
| Multi-menu web app designed to display and manage diverse operational data. The core feature, enables users to visualize the distribution of IndiHome ODPs across Indonesia. | Home for multiple web app, developed to support Makan Bergizi Gratis (MBG) program. The platform enables stakeholders to manage and monitor the distribution of nutritious meals for students nationwide. | Web app for surveys and quizzes that allows users to create, distribute, and participate in interactive questionnaires. It includes a reusable survey template by other users, provides real-time result tracking. |
